Minutes of meeting

We have determined the following critical research questions:

1. What is the composition ensiled seaweed (Phil K. and Randy)
2. Which enzymes are needed (Randi, Anne-Belinda and Guðmundur)
3. Does it still ferment (DTI)
4. How to yield an ensiled feedstock on pilot scale (8T ww) amendable for downstream processing?

We have decided that

1. DTI is in the lead for the Ethanol Fermentation

2. WR-FBR is in the lead for the ABE/IBE fermentation
3. AVT/ECN for one furanic fuel

Action Items:

1. Update planning, JvH, December, 2017
2. Run numbers of furanic Fuel (AVT, JvH)
3. Update fuel testing outline (JvH)
4. Distribute fuel testing programme (DTI, JvH)
5. Have a scale up meeting in January 2018 in Wageningen (WR-FBR and JvH)

Noted by Jaap van Hal (ECN).
